1 DEVICE INSTALLATION

Plug the NB-3023-U reader to a USB port and let the system install the latest Windows driver automatically from Windows Update (WU) Service.

Figure 1-1: Installing Latest Device Drivers for NB-3023-U reader

Note: Ensure that your PC is configured to install updates automatically through Windows Update. To do this, go to:

Settings\Update and Security\Windows Update\Advanced Options and select the 'Automatic (recommended)' dropdown menu option available under 'Choose how updates are installed'.

 ADVANCED OPTIONS Choose how updates are installed Automatic (recommended) Automatic (recommended) Choose how updates are using it. Updates won't download over a metered connection (where charges may apply). Give me updates for other Microsoft products when I update Windows. View your update history Choose how updates are delivered Get Insider builds Be one of the first to see future updates and improvements to Windows and provide feedback.

Figure 2-2: Accessing Accounts from Settings

3) On the left side of the Accounts window, click/tap on Sign-in options

Figure 2-3: Adding Fingerprints as a sign-in option

On the right side under **Windows Hello**, click/tap on **Setup** (first finger). Once you've setup the first finger, this option changes to **Add another** (after first time). Click on this new option to add a new finger

4) Enter your PIN to verify, and click/tap on **OK**.

Note : If you already added a finger, you may scan the registered finger on the fingerprint reader instead of entering your password.

3 Using Fingerprints On Your Windows 10 Device

Once the enrolment is complete (Step 2), you should be able to log-in to the system with the NB-3023-U fingerprint reader.

Your Windows 10 device can now also be unlocked with the simple touch of your enrolled finger.
